

# Billing & Tuition Management

Innovation. Problem solving. Unrivaled customer service. TADS pioneered it with financial aid, and we've brought the same philosophy to our Billing & Tuition Management system. We've talked to schools of all stripes and colors to create a solution that works. You've got hundreds of students and handling their tuition can monopolize your time. Time better spent building relationships. Our comprehensive program will streamline your tuition management, allow you unprecedented flexibility, and support you throughout the year. Whether your school is large or small — leave it to us.

## It's About Time.

Billing & Tuition Management by TADS saves you time — time handling paperwork, time investigating late payments, and time explaining details to parents. Leave that to us. Our program's features are designed to simplify the process, giving you more time to focus on students and their families.

## Accuracy You Can Bank On.

Our user-friendly web interface ensures information accuracy and proper documentation. Parents can easily access and manage their side of the equation so nothing gets lost in translation. Our leading edge technology helps you fill in the gaps. Forget about losing papers, tedious data entry, and human error. Leave accuracy to us.

## Finally. True Follow-Up.

TADS takes a dynamic approach to managing tuition by following up with parents personally. Other programs opt out of this service, putting the onus on administrators to ensure information is accurate and papers are signed. Give your staff a break — leave the logistics to us. Billing & Tuition Management by TADS means that we take the initiative to successfully facilitate payment, so you don't have to.

## YOUR SCHOOL IS BRILLIANT...

### What about your Billing & Tuition Management?

TADS provides proven solutions backed by support staff who truly care. Our software and services are built from our experience and school feedback from all over the country.

SERVING SCHOOLS AND FAMILIES

## A Perfect Fit, Every Time.

We've built this system to accommodate everyone's needs. That goes for schools and families. Tuition management allows you to create custom payment schedules for families – easily add charges, apply discounts, and account for scholarships or grants. Leave flexibility to us.

## Whole-School Billing. Easy.

Eliminate questions about invoice charges with line item billing. Application of credits and charges are easy to input and easy to view. This shows parents exactly what they are paying for, making billing easier for them to understand. Leave transparency to us.

## Customize Everything.

Our patent-pending Agreement Builder makes contracting easy. Customize your contract package to include your school's branding, terms, billing options, and welcome letter. Choose individual items, add them to the student's tuition list, and send them off. From there? Leave it to us. We manage your contract agreements with families on their terms, either electronically or through traditional paper billing. It's up to them. Either way, we follow up.

## Reports on the Fly.

Billing & Tuition Management's reporting function is comprehensive and fast. At a glance, the reports give you a clear picture of where your tuition collection stands. Aging, charge item allocation, credit item allocation, and cash flow reports are just a few available to you at any time. Need quick-access reporting to get the big financial picture? Just log on.

## Customer Service is TADS.

Hands-on, we'll-make-it-happen. We pride ourselves on full-service product and technical support for schools and families. Handling your questions and concerns is the best part of our day. TADS customer service representatives and technical specialists are there for whatever you need, wherever you need it. In person. On the phone. Online.

## Have questions?

We can't stop talking about tuition management, so give us a call. Make sure to ask for our Features Comparison Worksheet. It will help you compare TADS Billing & Tuition Management with to your current tuition management processes.
