

## Billing and Tuition Management Comparison Chart

Along with great customer service and current, secure technology, TADS offers many powerful features that simply cannot be found with any other tuition management service, regardless of price.

	TADS	Your Service
<b>All-Student, All-Event Billing System</b> — Tuition deposits, re-enrollment or new admissions application fees, you may bill and manage any fee at any time along with tuition.	✓	
<b>In-House Customer Support</b> — TADS auditors are all in-house (no outsourcing!) and go through rigorous product training so they can quickly address any questions. Simply put, we pick up the phone and give great support.	✓	
<b>Interface With Admissions, Enrollment and Financial Aid</b> — Our unique approach to consolidating all information in one system allows easy and powerful contract creation. View admission and enrollment status, financial aid awards and payment status for any event, greatly simplifying contract creation.	✓	
<b>Agreement Building and Sending with TILA</b> — After hearing frustrations from schools who used various tuition management programs, TADS listened and worked with those schools to create our patent-pending agreement builder. Manage all grants and scholarships, fees and credits, then click a button to have TADS send the agreement to the family.	✓	
<b>Grant, Charge and Credit Management</b> — Combined with our agreement builder and billing system you can now easily consolidate all your billing needs. TADS itemizes everything so the system is easy to use and transparent to your families.	✓	
<b>Follow-Up On Agreements Not Returned</b> — Like most schools you spend time tracking down who returned agreements and who hasn't. Our system easily reports this status. In addition we also email and call families who have not yet completed agreements. Our friendly staff is here to help your families fill out and return the agreements.	✓	
<b>No Cost for One and Two-Time Payers</b> — Services that charge to collect one and two payments from families inadvertently encourage schools to use separate billing processes. To simplify your processes, TADS does not charge for families paying in one or two installments.	✓	
<b>Easily Add Incidental Line-Item Fees &amp; Credits</b> — Adding an after school fee or work credit to an account has never been easier; our system allows you to quickly add any type of credits and fees to invoices throughout the year.	✓	
<b>TimeTracker App</b> — Our iPad application allows for check-in/check-out functionality with integrated billing.	✓	
<b>Add Notes and Flags to Accounts for Follow-Up</b> — Adding notes and flags can help you track accounts and alert TADS to situations or requested follow-up, helping us work together for greater effectiveness.	✓	
<b>Transfer Remittance 6x a Month</b> — TADS lets you get your money fast, holding your funds only long enough to clear (5-7 days). Schools receive detailed remittance report notification emails six times a month with reports available 24/7.	✓	
<b>Provide Detailed Subsidiary Accounts Receivable Ledger</b> — TADS gives you a comprehensive subsidiary ledger with detailed total receivables as well as detailed and summary aging reports.	✓	
<b>Phone Call Delinquent Accounts</b> — Along with reminder emails, our staff calls your families with a friendly follow-up phone call if they are not current on their account.	✓	
<b>Removal of Late Fees</b> — The TADS service is here to help your school achieve a high collection rate. Our late fees and the easy removal of those fees as incentive by TADS or the school encourages families to stay current.	✓	
<b>Flexible Agreements and Billing Options</b> — Flexibility is key for schools and families. Some families need to pay more during certain parts of the year because of seasonal income, some have unexpected hardships throughout the year and some are simply unpredictable payers. Through our flexible billing system, you can accommodate all types of families and payment plans, even allowing certain payment types per family, adding additional invoices with payment redistribution, and additional, stand-alone invoices all at no additional cost.	✓	
<b>Create a Billing Account Without an Agreement</b> — Ever had the need to simply bill a family for a fee outside of their tuition agreements? TADS allows you to easily create billing accounts and add invoices, charges, and credits.	✓
